67	The combination of asphalt, grass, trees, gardens and playground. There is a good variety of surfaces which allows for a lot of different activities. Between all my kids, we have now spent 9 years at Jackman and honestly, I am quite happy with the schoolyard. There can always be room for improvement, but I wouldn't say that I support a huge overhaul. I know that some people want a track or a bigger playground, but that always comes with a cost. For example, if you add a track, you might have to lose the baseball diamond or the vegetable garden and then somebody else is going to be disappointed. I think the schoolyard currently has a great variety of activities, so I only see a need for some improvements and upgrades of what currently exists, not a huge overall.	6/8/2017 3:27 PM
